my portflolio

PROFILE

Engineering student in Data Science and Artificial Intelligence at EMSI, with strong skills in Python, machine learning, and data analysis. Experienced in developing end-to-end data projects, including exploratory analysis, predictive modeling, and data pipeline design. Passionate about extracting insights from data and developing intelligent systems. Currently seeking a Data Science or Machine Learning internship to apply my analytical and programming skills to real-world problems

EDUCATION

Engineering Degree - 3rd Year - Data Science & Artificial Intelligence 2023 – Present
EMSI - École Marocaine des Sciences de l'Ingénieur

High School Diploma (Baccalauréat) - Physics and Chemistry 2023

TECHNICAL SKILLS

Programming Languages
Python, JavaScript, SQL, Dart, Java, C++

Data Science & Machine Learning
Pandas, NumPy, Scikit-learn, Matplotlib/Seaborn, Architecture RAG, FAISS, NLP (TF-IDF, Cosine Similarity), Web Scraping (BeautifulSoup)

Full-Stack & Web Development
React, Node.js, Express, Django, Streamlit, Three.js (WebGL), API REST

Mobile & Databases
Flutter, Hive (Offline-first), PostgreSQL, MySQL, API Integration

Tools & Environments
Git, Jupyter, VS Code, Postman

PERSONAL PROJECTS

DocuMind AI — Intelligent Q&A System (RAG)
- Developed a document analysis application based on Retrieval-Augmented Generation (RAG) architecture.
- Implemented vector search with FAISS and integrated the Gemini 2.5 API to generate grounded answers from user-uploaded PDFs.
- *Technologies: Python, Streamlit, RAG, FAISS, Gemini API.*

PropVal AI — Real Estate Valuation Platform
- Engineered an analytical dashboard predicting California property values in real-time with over 80% accuracy (R^2).
- Integrated a Machine Learning model (Random Forest) via a REST API with an interactive frontend featuring dynamic mapping.
- *Technologies: Python, Streamlit, Scikit-learn, Predictive Modeling.*

CineMatch AI — Recommendation Engine
- Created an advanced content recommendation engine based on Netflix metadata.
- Utilized TF-IDF vectorization and cosine similarity to analyze genres, descriptions, and cast members to generate highly accurate movie suggestions.

- *Technologies: Python, Scikit-learn, Machine Learning, Streamlit.*

Chronos Audio Pipeline — Data Engineering
- Developed an automated ETL pipeline for extracting historical music data.
- Scraped Billboard Hot 100 charts and interfaced with the Spotify OAuth API to programmatically generate playlists.
- *Technologies: Python, BeautifulSoup, REST API, Web Scraping*.

PROFESSIONAL EXPERIENCE

Software Developer / Full Stack Intern 09/2025 – 10/2025
Omnidata Casablanca
- Developed an end-to-end responsive Leave Management System web application (UI, backend logic, and database).
- Created custom interfaces with role-based access control: Employees (requests, history, PDF export), Managers (approval/rejection), and HR/Admins (balance management, holidays, leave types, data visualization, and Excel export).
- Integrated secure authentication via LDAP / Active Directory.

CERTIFICATIONS

Certificat Professionnel Data Science | IBM (Coursera)
- **Skills acquired:** Machine Learning, Data Analysis & Visualization (Python, Pandas, NumPy), SQL, Data Science Methodology

Introduction à la programmation orientée objet (en C++) | EPFL (Coursera)
- **Skills acquired:** Fundamental OOP concepts applied to C++ (encapsulation, inheritance, polymorphism).

100 Days of Code : The Complete Python Pro Bootcamp | Udemy
- **Skills acquired:** Advanced Python proficiency, Object-Oriented Programming (OOP), Automation, Web Scraping

Flutter & Dart – The Complete Course | Udemy
- **Skills acquired:** Dart language proficiency, cross-platform mobile app development (Flutter), Firebase integration (Backend, database, authentication), UI design.

Database Structures and Management with MySQL | Meta (Coursera)
- **Skills acquired:** Relational data modeling, Complex SQL queries, Database optimization.
